

Take action to resist new nukes and start global disarmament!

In 2016 the government will finalise the decision to build a new nuclear weapons system to replace Trident. Together we can stop them.

Between now and the next election (probably 2015) we are mobilising a mass public campaign of action against replacing Trident and we want YOU to get involved.

Replacing Trident is completely unnecessary and will be very costly at a time of budget cuts. It will dangerously undermine our security and violate international law.

WE HAVE JUST TWO YEARS TO STOP THIS THREATENING NUCLEAR PROJECT.

Nuclear weapons are linked to every major economic, health, environmental, humanitarian, moral and political issue facing us today, including climate change, militarism, poverty and insecurity.

The global movement for a treaty to ban nuclear weapons is gathering pace. NOW IS THE TIME for all of us to get involved and take AWEsome

action against replacing Britain's nuclear weapons.

For more about ACTION AWE, how it links to your campaigns, and how you can take part, please visit our website:
